

RE: CG Docket No. 03-123

Federal Communications Commission (FCC)

445 Twelfth Street SW

Washington, DC 20554

Dear Chairman Martin, Commissioners Adelstein, Copps, McDowell, and Tate:

I am a deaf person and I use Video Relay Service (VRS) to communicate. I was appalled to learn that the FCC staff is intent on drastically cutting the VRS rate, and effectively cutting VRS availability for the deaf. Instead of seeking to limit the number of deaf people with VRS access, the FCC should do everything in its power to make VRS available to more deaf people.

I, along with other Deaf individuals, use these services in both my work and personal life. It is an important way in which I/we communicate with both hearing and deaf individuals. I urge you to do everything you can to make VRS service available to the many deaf people who currently do not have access to this vital, life-changing service.

The VRS rate should encourage the VRS providers to:

- Serve more deaf people, not discourage them from reaching out to more deaf people
- Provide interpreter training programs so that there will be an adequate number of qualified interpreters for VRS and the local Deaf communities
- Provide service and technology improvements, such as the development of new videophone equipment, fulfilling the Americans with Disabilities Act (ADA) mandate of functionally equivalent telecommunications services

I, along with other deaf individuals, their families and coworkers, depend on VRS and other relay services.

Please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services.

Sincerely,

RE: CG Docket No. 03-123

Dear Chairman Martin, Commissioners Adelstein, Copps, McDowell, and Tate:

We are a new nonprofit organization devoted to serving the needs of Deaf/hard of hearing people. Most of our board members and the people we intend to serve use Video Relay Service (VRS) to communicate. We were appalled to learn that the FCC staff is intent on drastically cutting the VRS rate, and effectively cutting VRS availability for the Deaf/hard of hearing community. Instead of seeking to limit the number of Deaf/hard of hearing people with VRS access, the FCC should do everything in its power to make VRS available to more Deaf/hard of hearing people.

Many Deaf/hard of hearing individuals use these services in both work and personal lives. It is an important way in which we communicate with both hearing and Deaf individuals. Our organization urges you to do everything you can to make VRS service available to the many Deaf/hard of hearing people who currently do not have access to this vital, life-changing service.

The VRS rate should encourage the VRS providers to:

- ❖ Serve more Deaf/hard of hearing people, not discourage them from reaching out to them
- ❖ Provide interpreter training programs so that there will be an adequate number of qualified interpreters for VRS and the local Deaf communities
- ❖ Provide service and technology improvements, such as the development of new videophone equipment, fulfilling the Americans with Disabilities Act (ADA) mandate of functionally equivalent telecommunications services

Our organization, along with other Deaf/ hard of hearing individuals, their families and coworkers, depend on VRS and other relay services.

Please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide Deaf/hard of hearing people with functionally equivalent telecommunications services.

Sincerely,

Marianne Sasseen
